

FOR IMMEDIATE RELEASE

Environmental Leader Names Anuvia Plant Nutrients' SymTRX "2019 Product of the Year"

Zellwood, Fla.—May 16, 2019— Today, [Anuvia Plant Nutrients](#), a Florida-based agricultural technology company, is proud to announce that its product SymTRX™, an enhanced efficiency plant nutrient, was selected as an [Environmental Leader 2019 Product of the Year](#). Judged by an independent panel of industry and environmental experts, the winners are chosen based on the success of their product or by its impact on their industry.

The 2019 Environmental Leader Awards were presented at the Environmental Leader & Energy Manager Conference (ELEMCON) in Denver, Colo. The conference brings together the world's leading companies to help navigate the ever-increasing interaction among energy, sustainability, and environmental professionals.

According to the judging panel, SymTRX stood out for both its practical ability to help farmers increase productivity, as well as far-reaching benefits of reducing greenhouse gases by up to 32 percent on the acre in agriculture: This product not only reduces greenhouse gases it has direct benefits of enriching and sustaining agricultural lands. University and third-party research indicate a positive yield increase, which allows farmers to produce more food efficiently and profitability. This innovative product addresses the key issue of our time—how to meet future food demand with a smaller environmental footprint.

"It takes big, bold ideas to solve the crucial issue facing our planet of helping farmers produce enough food for a growing world population, while also reducing farming's burden on the Earth," says Amy Yoder, CEO, Anuvia Plant Nutrients. "It's up to us to be stewards of the planet, and use all our resources in wise, environmentally sound ways."

With the world's population [expected to increase](#) by 35 percent by 2050, the agriculture industry is increasingly looking for new innovative ways to reduce farming's demands on this earth.

SymTRX offers benefits for both farmer and planet, and with little to no barriers to implementation. Anuvia's plant nutrient product is a plug-and-play technology primed for fast adoption, with the ability to work within current agricultural processes and technologies, making it a turnkey part of achieving farmers' goals.
